

# RRV CANTER VECTOR REMOVAL

**OnLine OnTrack provide inhouse fully competent operators and safety critical staff.**

The Mitsubishi Canter offers a versatile and compact host vehicle for our specialist design vector removal unit. Capable of accessing short and tight access areas via the on-board turntable system this road rail vehicle can be on and off tracked quickly even fully loaded.

Benefitting from a 1200 cfm air moving system, ensuring there is no loss of vacuum this RRV has the power for a wide variety of applications within the rail environment including catch pit and culvert clean outs as well as wet beds and cable duct clearing.

**1200 cfm Air Moving System**

**4.5 ton Capacity**

**Turn Table on/off Tracking System**

**Multiple Applications Within Railway Environment**

**Fully Operated by OnLine-OnTrack Drainage Engineers**
