

# RRV UNIMOG HIGH PRESSURE WATER JETTER

OnLine-OnTrack has its own fleet of road rail Unimog high pressure water jetting units.

The Mercedes Unimog provides a perfect host vehicle for our specialist design high pressure water jetting unit. Complete with a turntable system that lifts the fully loaded vehicle to allow fast access to the line in short tight access spaces.

The proven 2000psi 178 ltrs per minute pump is directly run from the PTO drive, combined with the interchangeable jetting nozzles and 150 meters of hose this vehicle is perfect for remote on track railway drainage and culverts clean outs.
